

SUMMER 2022

CHANGE & NEW BEGINNINGS

JACK WOLFSKIN UNVEILS GROUND-BREAKING SUMMER COLLECTION

- FOR THE SUMMER OF '22, JACK WOLFSKIN PRESENTS A TECHNICALLY AMBITIOUS, SOPHISTICATED COLLECTION.
- THE BRAND'S ADVANCED INNOVATIONS - NOTABLY IN THE FOOTWEAR AND EQUIPMENT SEGMENTS - SET ENTIRELY NEW INDUSTRY BENCHMARKS.
- THE NEW DESIGNS ARE BORN FROM SUSTAINABILITY - THE FUNDAMENTAL CORNERSTONE THROUGHOUT THE REDESIGNED COLLECTION.

For more than four decades, German-based JACK WOLFSKIN has been a major name in the outdoor world. When the brand was founded in the early '80s, people were drawn to explore the world. And a growing number of these travellers became involved in hiking local trails and faraway destinations. JACK WOLFSKIN was hugely popular at the time, especially with **globetrotters** and those looking to escape everyday life for a limited moment or seeking **extreme travel experiences**. The outdoor boom of the '90s evolved to include more shared outdoor experiences among family and friends in nature. Today, the passion for **discovering** the environment through **adventures and expeditions** is at an all-time high. JACK WOLFSKIN considers it its mission to create many shared and transformative moments of discovery, for as many people as possible with its **performance equipment**, designed in Germany, applying all of the company's outdoor knowledge.

In the summer of 2022, the Idstein-based brand positions itself with confidence and ambition, to be a driving force in the outdoor industry, presenting a collection that sets the standards in both **sustainability and technical performance in all global markets**.

MILESTONES & PARTNERSHIPS

The 2022 summer collection features numerous innovations in the technical apparel range and at the core of the footwear and equipment segments.

Absolutely fundamental to JACK WOLFSKIN's **capacity for innovation** are the company's strong partnerships. For product development, JACK WOLFSKIN closely works with various leading experts in the textile industry - such as the renowned, long-established company **POLARTEC®**, or, starting recently, the talented young team at **brrr°**, who have developed a triple cooling technology utilizing natural effects of minerals. JACK WOLFSKIN also partnered with textile fibre manufacturer **Lenzing** to develop an absolute novelty: the world's first combination of a recycled membrane with a natural outer layer.

Further vital alliances include organizations such as the Fair Wear Foundation, Grüner Knopf (Green Button) and bluesign®. They are key cornerstones to the implementation and monitoring of strict social and ecological standards throughout the entire supply chain.

INSPIRATION & COMMUNITY

JACK WOLFSKIN's multi-functional products are ideal for pursuing a multitude of explorations as demonstrated through its #GOBACKPACK tours or hiking adventures on WOLFTRAILS. #GOBACKPACK is the brand's highly successful social media campaign, connecting countless backpackers around the world to form an inspiring community. This **campaign** will continue into the summer of 2022, taking a **fascinating, one-of-a-kind adventurous journey** to the vast and rugged landscapes of **Mongolia**. The WOLFTRAIL multi-day hikes, also brought to life by JACK WOLFSKIN, focus on **shared experiences in breath-taking natural landscapes**: the untouched wilderness of the Carpathian Mountains, the rugged solitude of the Scottish Highlands - or, as of summer of 2022, the **Austrian Alps**.

THE HIGHLIGHTS: SHAPING A SUSTAINABLE FUTURE

With its **new body-contact carrying system AEROSHAPE**, JACK WOLFSKIN substantiates its ambition to be an innovation driver in the industry: **recycled polyester, extremely efficient manufacturing processes, padding made from algae foam** - this carrying system featured in hiking and cycling backpacks is exceptional for its lightweight, comfort and resource-saving design.

JACK WOLFSKIN pioneers further significant innovations with the technical **TERRAVENTURE** hiking boots that pair **sustainability with reliable performance**. It's a first, integrating a recycled, waterproof and breathable TEXAPORE ECOSPHERE membrane into the footwear collection. As standard, the weatherproofing includes a hydrophobic material finish, allowing water to repel off the shoe without allowing water to penetrate the structure of the surface layer. This finish is applied without adding per- and polyfluorinated chemicals (PFC's).

"A sustainable, ecological footprint in footwear requires specialized material applications, processes and testing methods," says Selim Say, Vice President Footwear. "The mid-cut outdoor boot featuring a proprietary membrane, involves up to 150 different materials, thus being multiple times more complex than conventional footwear but you can feel the difference through the fit, comfort and performance."

Also, no other brands besides JACK WOLFSKIN offer bluesign® certified materials within the footwear industry. Therefore, the effort involved in selecting, manufacturing and testing a product is correspondingly higher than in other segments.

The popular, casual **ECOSTRIDE** Outdoor Lifestyle footwear models extensively rely on **natural as well as recycled materials**. Only undyed and resource-saving materials are chosen: organic cotton and hemp, natural as well as recycled rubber.

THE 3-LAYER-REVOLUTION

In the textile segment, JACK WOLFSKIN manages to be the outdoor industry's first brand to pair an **all-natural outer layer with a proprietary membrane made from recycled materials**. TEXAPORE ECOSPHERE LYOCELL 3L (three-layer) combines TEXAPORE ECOSPHERE membrane, made from a blend of post-consumer and pre-consumer waste, with TENCEL™ Lyocell fibres, which are sourced from sustainably managed wood.

"Our TEXAPORE ECOSPHERE LYOCELL 3L fabric marries the TEXAPORE ECOSPHERE membrane made from production cuttings, with an outer layer made from TENCEL™ Lyocell fibres," says Daniele Grasso, Vice President Product & Apparel. "In addition, a jersey inner is made from recycled polyester. Thus, our main material is composed of three sustainable fabrics, as we combine recycled materials with natural fibres."

JACK WOLFSKIN'S design team had to overcome the technical challenge of bonding TENCEL™ outer fabric with the TEXAPORE ECOSPHERE membrane and the reverse side. All three components react at different temperatures so the product developers went to great lengths to guarantee the waterproof performance while maintaining breathability. At the same time, the team had to ensure that the laminate was durable and would not disintegrate when washed.

Over time, each of these technical 3-layer jackets takes on a look of its own through wear and weather exposure adding to the individual appeal without losing performance attributes.

Innovation, sustainability and history come together in the Spring/Summer 2022 collection as JACK WOLFSKIN continues to expand its influence as an independent apparel, footwear and equipment brand that is designed for all explorers who live to discover. Please take a moment to personally explore the collection in depth through the following materials and contact us with questions and requests for samples and imagery. Until then, take time to get outside and experience our world with your friends and family.

ACTIVE OUTDOOR

INFINITE HIKE

Jack 
Wolfskin

UNITED WE HIKE

High-performance lightweight apparel and accessories for special outdoor adventures

With its INIFINTE HIKE line, in the summer of 2022 JACK WOLFSKIN once again emphasizes its ambitious role as a pioneer in ecological performance wear. The brand presents high-performance lightweights with an athletic look and focuses on sustainability down to the smallest detail. In this line, which is entirely PFC-free, the brand strictly relies on recycled materials - even in the very sophisticated backpacks with their complex designs.

For the versatile INIFINTE HIKE line, the development team has also had in mind the Wolftrail hiking adventures with the various challenges posed by weather and demanding terrain. These multi-day trails initiated by JACK WOLFSKIN are all about a sustainable as well as shared experience in unique natural landscapes. According to the claim United we Hike, the trails lead through the untouched wilderness of the Carpathian Mountains or the remote solitude of the Scottish Highlands - and starting in the summer of 2022, through the Austrian Alps.

- 01 EAGLE PEAK JACKET M** This multi-functional 2-layer jacket prepares even for adverse conditions: It is wind- and waterproof and highly breathable. The jacket is equipped with two hip pockets, chest pocket, inside pocket and adjustable hood.
Material: TEXAPORE O2+ DOBBY 2L: 100 % Polyester, bluesign® Product; Grüner Knopf
Weight: 500 g (Size M)
- 02 ROUTEBURN VEST M** This delightfully lightweight insulating vest is windproof, water repellent and warms even when wet. Both outer material and synthetic fibre filling are made of recycled polyester.
Material: STORMLOCK RIPSTOP 20D ECOSPHERE: recycled Polyester/Lining: MICROGUARD SUPERLOFT ECOSPHERE recycled Polyester bluesign® Product; Grüner Knopf
Weight: 220 g (Size M)
- 03 NARROWS T M** This versatile functional shirt is made of a lightweight, elastic and recycled fabric and offers excellent moisture management.
Material: STORMLOCK DOBBY 2L: 100 % Polyester/Lining: MESH Q.M.C.: 100 % Polyester, bluesign® Product; Grüner Knopf
Weight: 105 g (Size M)
- 04 MILFORD SKY FLEECE M** This new fleece jacket is suitable even for movement-intensive sports due to its high elasticity and durability. It is fast-drying, particularly breathable and offers the right amount of heat retention.
Material: NANUK DYNAMIC TERRY DWR: 90 % Polyester, 10 % Elastane/NANUK DYNAMIC HEATHER: 92 % Polyester, 8 % Elastane, bluesign® Product; Grüner Knopf
Weight: 400 g (Size M)
- 05 OVERLAND PANTS M** These very lightweight, wind- and water-repellent softshell pants offer excellent thermo-regulation due to their high breathability and, because of their generous elasticity, plenty of freedom of movement on long tours.
Material: FLEX SHIELD X-LITE UV: 94 % Polyamide, 6 % Elastane
Weight: 275 g (Size 50)
- 06 EAGLE PEAK CAP** This sporty-looking cap allows for convenient ventilation due to the side holes. Plus, reflective elements provide good visibility.
Material: STORMLOCK DOBBY 2L: 100 % Polyester/Lining: MESH Q.M.C.: 100 % Polyester
Weight: 70 g
- 07 ATHMOS SHAPE 28** This lightweight daypack is suitable for active hiking tours, allows full freedom of movement and is comfortable to carry. The fabrics are recycled, as is the new AEROSHAPE carrying system. Features include elastic side pockets, trekking pole attachment, hip belt pocket and accommodation for hydration pack.
Material: CROSS RIP 70D RE: recycled Polyamide, bluesign® Product; Grüner Knopf; **Weight:** 800 g; **Volume:** 28 l

HIKE DNA

Jack 
Wolfskin

BACK TO THE ROOTS

Reimagining Icons

For more than four decades, JACK WOLFSKIN has been a household name in the outdoor world. The company's DNA is defined by exciting adventures, revolutionary technologies, ground-breaking design and respect for nature. With its HIKE DNA collection, in the summer of 2022 JACK WOLFSKIN pays tribute to its heritage and revisits iconic styles from its history. The classics are reinterpreted with a nostalgic mix of materials: ripstop offers superior performance; a grid structure creates a modern retro look; organic cotton and recycled synthetic fibres are employed along with the TEXAPORE ECOSPHERE membrane, made from a combination of post-consumer waste and pre-consumer waste. HIKE DNA is a collection reflecting the fundamental values of the outdoor specialist: A collection inspired by its own tradition, by function and by nature.

[▶ DOWNLOAD PHOTO MATERIAL](#)

01 DNA RHAPSODY JACKET M This high-quality 2-layer jacket is water- and windproof due to the TEXAPORE ECOSPHERE membrane, made from post- and pre-consumer waste. Everything is individually adjustable, from the hood to the hem.

Material: TEXAPORE ECOSPHERE MINI OTTOMAN 2L: Recycled Polyester, bluesign® Product; Grüner Knopf
Weight: 605 g (Size M)

02 DNA BLOCK JACKET M This timeless and classic hooded jacket is water- and windproof with sustainable protection against the elements: the TEXAPORE ECOSPHERE membrane is made from post- and pre-consumer waste.

Material: TEXAPORE ECOSPHERE MINI OTTOMAN 2L: Recycled Polyester, bluesign® Product; Grüner Knopf
Weight: 590 g (Size M)

03 DENALI 75+10 MEN Designed for long excursions and big adventures, the Denali is a trekking backpack with an advanced design to accommodate well-organized equipment storage. The construction delivers comfortable load distribution with many options for adjustment that makes it exceptionally comfortable to carry over long distances. The robust material is made of recycled polyamide fibres that are extremely tear-resistant and still very lightweight.

Material: CROSS RIP 280D RE: recycled Polyamide, bluesign® Product; Grüner Knopf
Weight: 2790 g; **Volume:** 75+10 l

04 DNA BLOCK FLEECE M This sustainable as well as functional iconic jacket is made from windproof STORMLOCK GRID ECOSPHERE and POLARTEC® 100 SERIES fabric.

Material: POLARTEC® 100 SERIES: Recycled Polyester
Weight: 295 g (Size M)

05 DNA FLEECE M Classic and timeless, the DNA fleece provides the right level of warmth in a clean and versatile design. This timeless fleece jacket boasts progressive functionality due to the grid structure on the inside.

Material: NANUK DYNAMIC GRID / Lining: MESH LINING ECOSPHERE Q.M.C.: Recycled Polyester, bluesign® Product; Grüner Knopf
Weight: 345 g (Size M)

ACTIVE OUTDOOR
ATHLETIC HIKE

Jack 
Wolfskin

SOPHISTICATED APPAREL WITH PASSION FOR DETAIL

Minimalist design plus ultimate function for mountaineering

The ATHLETIC HIKE collection by JACK WOLFSKIN is aimed at active women who want to live out their passion for design and minimalism even when hiking. The monochrome styles impress with carefully designed, technical details and allow for versatile combinations thanks to the perfectly matched layering system. In these sportswear styles, JACK WOLFSKIN specifically focuses on making a minimalist understatement. They combine a timeless look with premium quality and ground-breaking innovations, such as the innovative brrr[®] cooling technology, which makes use of special minerals' natural effects. Particularly characteristic of the women's line is the wonderfully pleasant feel and the flowing design language that beautifully follows the shape of the body.

01 TERRAVENTURE 22

Sustainable next-to-skin comfort

- The robust, durable CROSS RIP material of the daypack is made of recycled polyester.
- The sustainable AEROSHAPE carrying system hugs the back perfectly and features an extremely effective ventilation system.
- AEROSHAPE focuses on resource-saving material use as well as the innovative One-Piece construction, which allows for increased efficiency in the manufacturing process.
- The mesh material is made from recycled polyester, the padding from algae foam.
- Integrated rain cover made from recycled material, padded hip belt, fastening options and a side pocket.

Material: ARMATECH CROSS RIP 300D RE: Recycled Polyester bluesign® Product; Grüner Knopf

Weight: 920 g; **Volume:** 22 l

03 TASMAN CLOUD JKT W

Weather protection as light as the clouds

- The 2-layer jacket is both water- as well as windproof, due to its weather protection technology.
- The durable polyamide material is extremely lightweight and manufactured by specialists in Japan.
- The crinkle style creates a very distinctive look.
- 2 side pockets, adjustable hood and hem.

Material: TEXAPORE RIPSTOP CRINKLE 2L: 100 % Polyamide

Weight: 270 g (Size S)

02 TASMAN CLOUD SHORT W

Twofold LightWeight

- These 2-in-1 shorts designed for running or hiking score with excellent wearing comfort, technical functionality and a special look.
- The extremely lightweight, nicely flowing material of the outer shorts strikes with its 3D look and a distinct feel. Despite the soft texture, they are extra durable.
- The inner shorts feel pleasant against the skin, effectively transport moisture to the outside and are both fast-drying as well as extremely elastic.
- Adjustable, elastic waistband.

Material: Outer shorts: RIPSTOP CRINKLE: 100 % Polyamide /Inner shorts: SINGLE JERSEY HEATHER Q.M.C. S.FRESH: 45 % Polyester, 45 % Polyamide, 10 % Elastane

Weight: 150 g (Size S)

04 TASMAN CLOUD FLEECE W

Versatile Fleece

- This highly elastic hooded jacket allows for extremely versatile use.
- It provides warmth and simultaneously offers great breathability for athletic activities.
- The technical fleece material NANUK DYNAMIC SUPERSTRETCH is very comfortable, the contrasting fabric with its crinkle effect adds a unique look to the style.
- 2 side pockets, hood, thumb loops.

Material: NANUK DYNAMIC SUPERSTRETCH / RIPSTOP CRINKLE

Weight: 355 g (Size S)

05 TASMAN CLOUD VEST**Dynamic activity vest**

- The hooded vest is the perfect protective shield for athletic activities in the mountains.
- The technical fleece material NANUK DYNAMIC SUPERSTRETCH allows for any movement and features a smooth surface that is very durable.
- Plus it provides cosy warmth and simultaneously offers great breathability.
- The contrasting material with its crinkle effect creates a unique look for the style.
- 2 side pockets, hood.

Material: NANUK DYNAMIC SUPERSTRETCH / RIPSTOP CRINKLE
Weight: 285 g (Size S)

07 TASMAN S/S W**Natural cooling**

- The functional short-sleeved shirt relies on the innovative brrr° technology: natural minerals provide a triple chill effect through cooling, actively transporting moisture, and drying fast.
- brrr° is permanently embedded into the fibre and cannot be washed out.
- Likewise, the soft fabric offers excellent moisture management and keeps cool for long periods of time.
- The high elasticity allows for full freedom of movement.

Material: SINGLE JERSEY COOLING Q.M.C. S.FRESH: 87 % Polyester, 13 % Elastane
Weight: 150 g (Size S)

06 TASMAN L/S W**Triple Performance**

- The functional long-sleeved shirt relies on the innovative brrr° technology: natural minerals provide a triple chill effect through cooling, actively transporting moisture, and drying fast.
- brrr° is permanently embedded into the fibre and cannot be washed out.
- The fabric offers excellent moisture management and is highly elastic.
- Thumb loops.

Material: SINGLE JERSEY COOLING Q.M.C. S.FRESH: 87 % Polyester, 13 % Elastane
Weight: 150 g (Size S)

08 HIKE LITE TIGHT W**Technical comfort**

- The lightweight hiking leggings offers extra freedom of movement and optimal ventilation.
- The elastic material transports moisture fast and breathes efficiently. The airy mesh inserts provide additional ventilation.
- The waistband is wide, therefore offering especially high wearing comfort.
- The hidden pocket in the waistband will also fit a smartphone.

Material: TIGHT INTERLOCK Q.M.C: 88 % Polyester, 12 % Elastane
Weight: 230 g (Size S)

**ACTIVE OUTDOOR
CORE**

**Jack
Wolfskin**

MADE FOR NATURE

Long-lasting quality is the base

JACK WOLFSKIN presents a (literally) fundamentally new hiking collection for the summer of 2022 named HIKE CORE that bundles a wide range of outdoor essentials. The series is based on a claim “Made for Nature” that is reflected both in the use of mono-materials as well as in the distinctive use of natural colour tones. The styles for extended hikes cover all layers as well as product categories: from waterproof jackets with TEXAPORE ECOSPHERE waterproof-breathable membrane, made from a blend of post- and pre-consumer waste; to shirts made from SEAQUAL, a supple-soft fibre recycled from ocean plastic waste; to backpacks entirely made from recycled materials. These classic styles and functional all-rounders all feature a time-less design making them multifunctional as well as sustainably long-lasting.

[▶ DOWNLOAD PHOTO MATERIAL](#)

01 HIGHEST PEAK 2.5L M Although this technical hooded jacket barely weighs anything, it still protects against the elements and is highly elastic. It features multiple ventilation and adjustment options and may be packed into its own pocket.

Material: TEXAPORE STRETCH 2.5L: 100 % Polyester, bluesign® Product; Grüner Knopf

Weight: 305 g (Size M)

02 HIGHEST PEAK VEST M This athletic vest is truly suited to any outdoor pursuit. It is constructed with a comfortably smooth softshell material that is windproof and water-repellent. The fabric's stretch component allows for optimal freedom of movement.

Material: STORMLOCK SOFTSHELL JERSEY 3L: 100 % Polyester, bluesign® Product; Grüner Knopf

Weight: 295 g (Size M)

03 OCEAN TRAIL T M This functional shirt's message is crystal clear: I'm a Re(Cyclist). Along with organic cotton, the shirt is made from soft SEAQUAL fibres, recycled out of plastic waste collected in the ocean.

Material: SEAQUAL® SINGLE JERSEY HEATHER: 60% Organic Cotton, 40% recycled Polyester

Weight: 160 g (Size M)

04 PEAK PANT M Due to their classic design, all-round qualities and excellent wearing comfort, these durable, highly elastic pants can be used for a wide range of activities.

Material: STRETCH RIPSTOP UV Q.M.C.: 94 % Polyamide, 6 % Elastane, bluesign® Product; Grüner Knopf

Weight: 270 g (Size 50)

05 WOODLAND 2 TEXAPORE LOW M This sportive multifunctional shoe delivers excellent comfort as well as protection on extended walks or basic hikes. It's distinguished through the unique combination of innovative technologies.

Material: Textile; Second Material: Synthetic Lining: TEXAPORE; **Sole:** Rubber / EVA

Weight: 852 g (Size 8)

06 WOLFTRAIL 28 RECCO This new backpack features an extremely breathable AEROSHAPE carrying system that perfectly moulds to the back. The Wolftrail is manufactured through a resource-conserving process and is made from recycled materials. Even the main material and the inner lining are recycled. Along with the built-in safety technology RECCO System, this sporty and lightweight backpack offers many practical and sophisticated features.

Material: CROSS RIP 210D RE: recycled Polyamide, bluesign® Product; Grüner Knopf

Weight: 1060 g; **Volume:** 28 l

[▶ DOWNLOAD PHOTO MATERIAL](#)

01 HIGHEST PEAK 2.5L W Although this technical hooded jacket weighs just 260 g, it still protects against the elements and is highly elastic. It features multiple ventilation and adjustment options and may be packed into its own pocket.

Material: TEXAPORE STRETCH 2.5L: 100 % Polyester, bluesign® Product; Grüner Knopf

Weight: 260 g (Size S)

02 TURBULENCE FLEECE W This hooded jacket is a true all-rounder that is constructed with a highly elastic, breathable fleece material that allows for maximum freedom of movement and is particularly comfortable to wear.

Material: NANUK DYNAMIC SUPERSTRETCH: 94 % Polyester, 6 % Elastane

Weight: 340 g (Size S)

03 PEAK GRID FLEECE W With its classic elegance and reliable functionality, this fleece jacket is equally at home in town or in the mountains. It offers high elasticity and breathability, has a subtle smooth surface and is still durable.

Material: NANUK DYNAMIC GRID: 95 % Polyester, 5 % Elastane, bluesign® Product; Grüner Knopf

Weight: 330 g (Size S)

04 TECH T W This lightweight functional shirt wicks moisture effectively, dries fast and feels comfortable next to the skin. The timeless design makes the Tech T durable and particularly multifunctional.

Material: JERSEY PLAIN Q.M.C. S.FRESH: 100 % Polyester

Weight: 84 g (Size S)

05 PEAK SHORT W Classically beautiful and suitable for any activity: These durable shorts allow plenty of freedom of movement, are made from resistant rip-stop material and transfer moisture away from the body fast.

Material: STRETCH RIPSTOP UV Q.M.C.: 94 % Polyamide, 6 % Elastane, bluesign® Product; Grüner Knopf

Weight: 175 g (Size 36)

06 WOODLAND 2 HYBRID LOW W DThis sportive multifunctional shoe delivers excellent comfort on extended hikes or excursions. This is provided by the breathable upper material and a very comfortable EVA midsole.

Material: Suede; **Second Material:** Textile; **Sole:** Rubber / EVA

Weight: 584 g (Size 4)

ACTIVE OUTDOOR BIKE

Jack
Wolfskin

UNITED WE BIKE

Technical, Sophisticated, Sustainable Apparel, Packs and Accessories

Cycling is the most sustainable means of transport - and accordingly the topic of sustainability characterizes JACK WOLFSKIN's new BIKE collection. The Idstein, Germany-based brand is committed to manufacturing products entirely free of PFCs. This includes new accessories, bike bags and backpacks rounding off the 2022 summer collection. These are perfect for day trips, overnights, or multi-day bike camping trips. The bike wear collection is specifically tailored to cycling use combining both lightness and comfort with dependable performance. JACK WOLFSKIN pays great attention to detail in terms of fit, visibility and functionality. One of the details is the innovative brrr° technology that integrates natural minerals to create a triple chill effect through cooling, actively transporting moisture and drying fast. An added bonus is that brrr° is firmly embedded into the fibre and cannot be washed out.

01 AT HOME OUTDOORS CAP M For those few occasions, when the head is not protected by a helmet, the recycled polyester fabric of this cool cap is breathable, quickly transfers moisture and provides sun protection.

Material: RECYCLED TWILL

Weight: 95 g

02 TOURER SOFTSHELL JKT M This triple-layer, highly breathable softshell jacket provides reliable wind and weather protection on all types of tours. The jacket features a material mix of STORMLOCK on the front and FLEX SHIELD COOLING on the back. Bike-specific details such as the drop-tail design, tight hem and collar, reflective details and a back pocket complement the jacket's design.

Material: STORMLOCK INFINITY SOFTSHELL JERSEY 3L

Weight: 320 g (Size M)

03 TOURER SOFTSHELL VEST M This athletic softshell vest is a versatile companion on any tour: it offers wind-protection as well as water-repellency and still provides excellent thermo-regulation due to the innovative brrr°-cooling technology.

Material: FLEX SHIELD COOLING / STORMLOCK PAPERTOUCHE

Weight: 245 g (Size M)

04 TOURER PADDED SHORTS M The soft, elastic, quick-drying and breathable liner with its technical, men's specific padding provides a comfortable ride even on long tours. Slipping is prevented due to an internal rubber printing on the leg that keep the shorts from riding up the thighs.

Material: NYLON TRICOT Q.M.C

Weight: 160 g (Size M)

05 TOURER MIDLAYER JKT M A mixture of materials provides high-performance comfort as well as protection. The drop-tail jacket is made of recycled polyester. Reflective elements provide visibility.

Material: TECH BASELAYER ECOSPHERE S.FRESH Q.M.C DÉCOR: Recycled Polyester

Weight: 260 g (Size M)

06 TOURER SHORTS M These athletic, lightweight and pleasantly soft shorts with leg pocket are made from wind- and water-repellent softshell material and provide terrific thermo-regulation due to the innovative brrr° cooling technology.

Material: FLEX SHIELD COOLING: 100 % Polyester

Weight: 200 g (Size 50)

07 TOURER GLOVE SHORT These short-finger gloves minimize pressure and vibration due to the anatomical gel padding and feature practical pull-out loops as well as a Velcro cuff.

Material: FLEX SHIELD / STRETCH MESH / FRENCH TERRY Q.M.C. / Silicone Gel

Weight: 75 g (Size L)

 **DOWNLOAD PHOTO MATERIAL**

01 PACK AND GO! OVERHEAD M A modern slip-over jacket that weighs barely anything and yet is packed with functionality. The hood is integrated into the collar, the robust TEXAPORE RIPSTOP fabric [IS THIS WEATHER RESISTANT OR WATERPROOF BREATHABLE?] protects against rain and wind and the jacket can be stowed into its own pocket.

Material: TEXAPORE RIPSTOP LIGHT 2.5L: 100 % Polyester / STORMLOCK RIPSTOP 20D ECOSPHERE: Recycled Polyester, bluesign® Product; Grüner Knopf; **Weight:** 230 g (Size M)

02 PACK AND GO! WINDSHELL M A windproof, permanently water-repellent shell that weighs just 135 grams. The fabric is made from recycled polyester fibres. The jacket can be packed into one of its two side pockets.

Material: STORMLOCK RIPSTOP 20D ECOSPHERE: Recycled Polyester, bluesign® Product; Grüner Knopf; **Weight:** 135 g (Size M)

03 PACK AND GO! POLO M This classical polo T-shirt is suitable to all occasions - and remains cool and comfortable for an extended period of time. The soft fabric provides pleasant cooling as well as excellent moisture management and dries fast.

Material: SINGLE JERSEY HEATHER Q.M.C. S.FRESH: 100 % Polyester; **Weight:** 170 g (Size M)

04 PACK AND GO! PANT M These softshell pants are lightweight and low maintenance, thanks to their fast-drying fabric that protects against the elements and UV exposure. A highly elastic top is non-binding and makes the pants ideal for travel or trail.

Material: MINI RIPSTOP DOUBLE WEAVE X- LITE UV Q.M.C.: 91 % Polyamide, 9 % Elastane / Lining: MESH LINING ECOSPHERE: Recycled Polyester, bluesign® Product; Grüner Knopf; **Weight:** 235 g (Size M)

05 PACK AND GO! SHORT M Understated in design, chic in town, functional on hikes: These 165 gram, lightweight softshell shorts provide excellent thermo-regulation, repel the elements and can be packed into their own pocket.

Material: MINI RIPSTOP DOUBLE WEAVE X- LITE Q.M.C.: 91 % Polyamide, 9 % Elastane / Lining: MESH LINING ECOSPHERE: Recycled Polyester, bluesign® Product; Grüner Knopf; **Weight:** 165 g (Size M)

06 PACK AND GO! CAP The weather may do as it pleases: This softshell cap shields from the sun as well as the rain and effectively regulates temperature and moisture. Pack Sack is included.

Material: MINI RIPSTOP DOUBLE WEAVE X- LITE Q.M.C.: 91 % Polyamide, 9 % Elastane; **Weight:** 70 g (Size M)

07 JWP ULTRALIGHT PACK A practical backpack, yet barely noticeable: it holds 24 litres and weighs 190 grams. The lightweight fabric made of recycled polyamide is durable and the breathable shoulder straps are adjustable. The backpack can be packed into its inner pocket.

Material: CROSS RIP 70D RE: recycled Polyamide, bluesign® Product; Grüner Knopf; **Weight:** 190 g; **Volume:** 24 l

[▶ DOWNLOAD PHOTO MATERIAL](#)

01 PACK AND GO! SHELL W This hooded, minimalist jacket never compromises on functionality through its sustainable design. The TEXAPORE ECOSPHERE waterproof breathable membrane, consisting of a compound of post and pre consumer waste, protects against the elements.

Material: TEXAPORE ECOSPHERE STRETCH 2L: Recycled Polyester / Lining: MESH LINING ECOSPHERE: Recycled Polyester, bluesign® Product; Grüner Knopf; **Weight:** 330 g (Size S)

02 PACK AND GO! WINDSHELL W A windproof, permanently water-repellent shell that weighs just 135 grams. The fabric is made from recycled polyester fibres. The jacket can be packed into one of its two side pockets.

Material: STORMLOCK RIPSTOP 20D ECOSPHERE: Recycled Polyester, bluesign® Product; Grüner Knopf; **Weight:** 120 g (Size S)

03 PACK AND GO! PANT W These softshell pants are lightweight and low maintenance, thanks to their fast-drying fabric that protects against the elements and UV exposure. The top is highly elastic making it ideal for travel or trail.

Material: MINI RIPSTOP DOUBLE WEAVE X- LITE Q.M.C.: 91 % Polyamide, 9 % Elastane / Lining: MESH LINING ECOSPHERE: Recycled Polyester bluesign® Product; Grüner Knopf; **Weight:** 210 g (Size S)

04 PACK AND GO! SHORT W Understated in design, chic in town, functional on hikes: These 135 gram, lightweight softshell shorts provide excellent thermo-regulation, repel the elements and can be packed into their own pocket.

Material: MINI RIPSTOP DOUBLE WEAVE X- LITE Q.M.C.: 91 % Polyamide, 9 % Elastane / Lining: MESH LINING ECOSPHERE: Recycled Polyester bluesign® Product; Grüner Knopf; **Weight:** 135 g (Size S)

05 JWP MIDLAYER W Town, country, mountains - with its classically understated design, high breathability and pleasant soft feel to the touch, this sporty midlayer may be worn anywhere.

Material: NANUK DYNAMIC TECH Q.M.C.: 46 % Polyamide, 37 % Polyester, 17 % Lyocell (Tencel) / Lining: MESH LINING ECOSPHERE: Recycled Polyester, bluesign® Product; Grüner Knopf; **Weight:** 340 g (Size S)

06 PACK AND GO! ¾ T W This functional shirt with ¾-sleeves appeals with a pleasant cooling effect and a silky-soft finish. The fabric dries fast and stays cool for an extended period of time.

Material: SINGLE JERSEY HEATHER Q.M.C. S.FRESH: 100 % Polyester; **Weight:** 120 g (Size S)

07 VOJO 3 VENT LOW W This lightweight multi-functional shoe is as comfortable as it gets with active ventilation. It's designed with natural brrr® technology that provides a triple chill effect that actively cools, wicks away sweat rapidly and dries fast. The EVA midsole provides cushioning for all-day comfort.

Material: Recycled PU Suede; **Second Material:** recycled Polyester Mesh; Lining: Polyester; **Sole:** Rubber/EVA; **Weight:** 534 g (Size 4)

CAPSULE COLLECTION

365

**Jack
Wolfskin**

THE DYNAMICS OF THE CITY

For all those who focus on trends as well as sustainability

In its 365 collection, JACK WOLFSKIN subtly unites apparent opposites through outdoor details such as the utility vests, cargo pockets and mesh inserts that merge athletic dynamics with a progressive urban look. Alpine themes are reflected in modern, abstract prints, and iconic retro pieces that blend with a classic-clean style. Yet, the collection is defined by highly functional, sustainable materials. JACK WOLFSKIN relies as much as possible on recycled materials and natural fibres such as organic cotton and makes a sustainable statement with TEXAPORE ECOSPHERE waterproof breathable membrane, consisting of a mixture of post- and pre-consumer waste. Furthermore, many products are certified according to bluesign® that upholds rigorous sustainability standards throughout the entire supply chain and manufacturing process. Several of the designs have received Grüner Knopf (Green Button) accolades, all while maintaining a look that complements the urban lifestyle.

[▶ DOWNLOAD PHOTO MATERIAL](#)

MEN

01 365 REBEL HOODY M The classic, cosy, cool hoodie with contrasting inner sleeves and front pouch pocket is made of organic cotton with a particularly pleasant, soft feel.

Material: HEAVY PURE ORGANIC COTTON FRENCH TERRY: 100 % Organic Cotton; **Weight:** 730 g (Size M)

02 365 REBEL OVERHEAD M The lightweight slip over jacket with its cool crinkle look and front pouch pocket is both understated and functional. The STORMLOCK ECOSPHERE PAPERTOUCHE CRINKLE material is windproof and conveniently lightweight.

Material: STORMLOCK ECOSPHERE PAPERTOUCHE CRINKLE: Recycled Polyamide, bluesign® Product; Grüner Knopf
Weight: 220 g (Size M)

03 365 REBEL VEST M Muted natural colours, ample sized cargo pockets and mesh inserts - the vest delivers ideal protection whenever a full jacket is too warm. It is made of recycled polyamide and offers convenient wind protection.

Material: STORMLOCK TASLAN ECOSPHERE CRINKLE 2L: recycled Polyamide / RUGGED FISHERMANS MESH / **Lining:** MICROGUARD
Weight: 390 g (Size M)

04 365 REBEL PRINTED FLEECE M This urban fleece sweater with short zipper translates alpine scenes into modern, abstract prints. The recycled polyester fabric offers terrific wearing comfort. Two practical side pockets provide plenty of storage space and a cool and relaxed look.

Material: NANUK 150 ECOSPHERE DECOR: Recycled Polyester
Weight: 415 g (Size M)

05 365 REBEL SHORT M Urban style shorts made from particularly durable recycled polyamide fibres that are popular for its modern look and distinctive feel.

Material: STORMLOCK TASLAN ECOSPHERE CRINKLE 2L: Recycled Polyamide / RUGGED FISHERMANS MESH
Weight: 210 g (Size M)

06 365 J-BAG A 6-liter contemporary J-shaped bag, which may either be worn comfortably across the chest or casually on the back. Thanks to its two-way zipper, the main compartment is freely accessible from both sides, regardless of the way the bag is carried. On top, an extra zippered front pocket provides additional storage space.

Material: FULL DULL 300D RE: Recycled Polyester, bluesign® Product; Grüner Knopf
Weight: 160 g (Size M); **Volume:** 6 l

07 365 REBEL CAP A lightweight cap with a stylish, contemporary shape made of durable, recycled polyamide. The QMC and S.Fresh details provide active moisture management and have an odour-inhibiting and antibacterial effect. The mesh sides allow for a pleasant breeze.

Material: STORMLOCK ECOSPHERE PAPERTOUCHE CRINKLE: Recycled Polyamide
Weight: 85 g (Size M)

[▶ DOWNLOAD PHOTO MATERIAL](#)

01 365 REBEL JACKET W In terms of contemporary and cool styling, this wind- and waterproof jacket makes a statement with an outer fabric made from durable recycled polyamide, featuring roomy cargo pockets, a parka style, and a crinkle finish.
Material: TEXAPORE TASLAN CRINKLE 2L: Recycled Polyamide / **Lining:** LINING TAFETTA ECOSPHERE: Recycled Polyester
Weight: 530 g (Size S)

02 365 REBEL OVERHEAD W The lightweight slip over jacket with its cool crinkle look and front pouch pocket is both understated and functional. The STORMLOCK ECOSPHERE PAPERTOUCHE CRINKLE material is windproof and conveniently lightweight.
Material: STORMLOCK ECOSPHERE PAPERTOUCHE CRINKLE: Recycled Polyamide, bluesign® Product; Grüner Knopf
Weight: 200 g (Size S)

03 365 REBEL PRINTED FLEECE W This urban fleece sweater with short zipper translates alpine scenes into modern, abstract prints. The recycled polyester material offers great comfort and the adjustable hem creates a chic balloon shape.
Material: NANUK 150 ECOSPHERE DECOR: Recycled Polyester, **Weight:** 355 g (Size S)

04 365 REBEL FLEECE W This cuddly sweater is made with a POLARTEC® sustainable functional fleece that delivers the right amount of warmth. The high collar keeps the neck warm and a button tab adds convenience and style. The adjustable hem creates a stylish balloon shape.
Material: POLARTEC® 100 SERIES: 80 % Recycled Polyester, 20 % Polyester / STORMLOCK ECOSPHERE PAPERTOUCHE CRINKLE: Recycled Polyamide bluesign® Product; Grüner Knopf; **Weight:** 285 g (Size S)

05 365 REBEL SHORT W These lightweight shorts in a contemporary crinkle style are made from recycled polyamide fibres. They feature a modern and sporty length, offer a flattering fit and are finished in urban colours.
Material: ECOSPHERE PAPERTOUCHE CRINKLE: Recycled Polyamide / MESH LINING ECOSPHERE Q.M.C.: Recycled Polyester, bluesign® Product; Grüner Knopf; **Weight:** 160 g (Size S)

06 365 BOTTLE HOLSTER This practical as well as sustainable companion for an era in which disposable bottles are outdated: The holster accommodates drinking bottles up to 1.5 l and is made from easy-to-clean, recycled polyamide. The padding both protects the bottle and provides lightweight insulation. A mesh pocket on the front offers storage for important essentials.
Material: CROSS RIP 70D RE: Recycled Polyamide, bluesign® Product; Grüner Knopf; **Weight:** 90 g

07 365 POUCH Small, compact, practical - and stylish! This sturdy pouch comes with an adjustable cord-look strap and stores essentials in its zippered, mesh pocket on the front.
Material: CROSS RIP 70D RE: Recycled Polyamide, bluesign® Product; Grüner Knopf; **Weight:** 60 g

OUTDOOR LIFESTYLE
NATURE

Jack 
Wolfskin

INSPIRED BY NATURE

Modern purists, naturally sophisticated apparel

Capturing the calm colours of the forests, JACK WOLFSKIN's NATURE collection is characterized by natural and sustainable fabrics that appeal for their soft texture. Metal zippers and buttons add a modern touch, while technical details point to the style's functional properties. Apart from relying on sustainable dyeing processes, organic cotton and hemp, JACK WOLFSKIN introduces one more ground-breaking innovation: it's the outdoor industry's first brand to successfully combine an all-natural outer fabric with a membrane made from recycled materials. TEXAPORE ECOSPHERE LYOCELL 3L bonds the TEXAPORE ECOSPHERE waterproof breathable membrane, made from a compound of post-consumer and pre-consumer waste, with TENCEL™ Lyocell fibres, created from sustainably farmed eucalyptus. The line is complemented with equipment and accessories that feature the same materials as the apparel products and combine a pure, modern design with sustainability.

[▶ DOWNLOAD PHOTO MATERIAL](#)

01 TERRA RISE JACKET M

Natural Purist

- This technical 3-layer jacket combines a purist-inspired design with superior performance and sustainability.
- The wind- and waterproof membrane consists of mixture of post-consumer and pre-consumer waste, the outer shell is made from soft and supple TENCEL™ Lyocell fibres - a global novelty developed in cooperation with fibre specialist Lenzing: sustainability in a modern and functional style.
- Unique look: As a result of frequent wear and weather exposure, the exterior develops individual character, making each jacket unique.
- Reflective details add cool highlights and provide good visibility.

Material: TEXAPORE ECOSPHERE LYOCELL 3L: 81 % LYOCELL, 19 % recycled Polyester

Weight: 670 g (Size M)

02 NATURE JACKET M

Calm colours, lightweight

- The comfortably lightweight yet natural outer material echoes the symbiosis of nature and technology in this hooded jacket with high, protective collar and wide cover flap.
- The wind- and waterproof fabric combines pleasantly soft organic cotton with durable polyamide fibres.
- Chest pocket, one interior and two side pockets, adjustable hood and hem.

Material: TEXAPORE FUNCTION 65 LIGHT 2L: 59 % Organic Cotton, 41 % recycled Polyamide /

Lining: MESH LINING ECOSPHERE Q.M.C.: recycled Polyester

Weight: 535 g (Size M)

03 NATURE HALF ZIP M

Perfect blend

- The benefits of four different fibres unite in this shirt with high collar and zipper: the soft texture of organic cotton and TENCEL™ Lyocell fibres, the durability and thermal properties of hemp, and the moisture management of recycled polyester.
- The style features a soft melange material, an exceptionally modern silhouette, small reflective details and a chest pocket.

Material: NANUK DYNAMIK FRENCH TERRY NATURE: 34 % Organic Cotton, 32 % LYOCELL, 28 % recycled Polyester, 6 % Hemp

Weight: 400 g (Size M)

04 NATURE SUMMER SHIRT M

Summer at ease

- A classic in its most natural form: The shirt's fabric consists of a blend of organic cotton and hemp.
- Organic cotton offers that pleasantly soft and subtle feel, while resource-saving hemp provides durability and excellent thermo-regulation.
- Chest pocket, reflective details on the back.

Material: YARNDYED NATURAL FIBER HEMP: 55 % Hemp, 45 % Organic Cotton

Weight: 260 g (Size M)

05 ANCHOR HIPBAG

Hip and practical

- This cool hip pack holds 3 litres and sits comfortably due to its soft, padded back and the extra wide belt strap.
- The recycled polyester fabric is durable and easy to clean.
- The well-arranged interior as well as the two accessory pockets on the front keep you well organized.

Material: CANVASTECH: recycled Polyester bluesign® Product; Grüner Knopf

Weight: 220 g; **Volume:** 3 l

01 TERRA RISE JACKET W

Natural Purist

- This long-cut technical 3-layer jacket combines a purist-inspired design with superior performance and sustainability.
- The wind- and waterproof membrane consists of mixture of post-consumer and pre-consumer waste, the outer shell is made from soft and supple TENCEL™ Lyocell fibres - a global novelty developed in cooperation with fibre specialist Lenzing: sustainability in a modern and functional style.
- Unique look: As a result of frequent wear and weather exposure, the exterior develops individual character, making each jacket unique.
- Reflective details add cool highlights and provide good visibility.

Material: TEXAPORE ECOSPHERE LYOCELL 3L: 81 % LYOCELL, 19 % recycled Polyester

Weight: 680 g (Size S)

02 NATURE JACKET W

Calming colours

- The comfortably lightweight yet natural outer material echoes the symbiosis of nature and technology in this hooded jacket with high, protective collar and wide cover flap.
- The wind- and waterproof fabric combines pleasantly soft organic cotton with durable polyamide fibres.
- Hidden chest pocket, one interior and two side pockets, adjustable hood and hem.

Material: TEXAPORE FUNCTION 65 LIGHT 2L: 5 % Organic Cotton, 41 % recycled Polyamide /

Lining: MESH LINING ECOSPHERE Q.M.C.: recycled Polyester

Weight: 460 g (Size S)

03 NATURE FLEECE JACKET W

Simple elegance

- This jacket's comfortably warming and breathable fleece fabric combines soft organic cotton with the thermal and moisture-regulating properties of recycled polyester fibres.
- Metal zippers add cool highlights to the natural style.
- The minimalistic design, in combination with the fabric's Sherpa-pattern, turns this jacket into a very special fleece.
- Two side pockets

Material: NANUK 300 TERRY FACE NATURE: 75 % recycled Polyester, 25 % Organic Cotton

Weight: 500 g (Size S)

04 NATURE MOUNTAIN CAP

Well covered

- Made from lightweight STORMLOCK Softshell fabric, this cap protects against the elements and is breathable all at once.
- The high organic cotton content offers a soft feel, the recycled polyamide provides durability and moisture management.
- The contemporary interpretation of a mountain print shows the collection's ties to Jack Wolfskin's roots.

Material: STORMLOCK FUNCTION 65 LIGHT 2L: 59 % Organic Cotton, 41 % recycled Polyamide

Weight: 90 g

05 NATURE RELIEF DRESS

Dressed chic

- This beautifully flowing dress made from recycled polyester and viscose is moisture-regulating and allows for a pleasant breeze
- The soft feel of the fabric creates a particularly comfortable wearing sensation.
- The sustainable dyeing process uses significantly less water, energy and chemicals while achieving long-lasting, non-fading colours

Material: SINGLE JERSEY NATURE FUTURE DYE: 70 % recycled Polyester, 30 % Viscose (Bamboo)

Weight: 285 g (Size S)

OUTDOOR LIFESTYLE ESSENTIALS

Jack
Wolfskin

ALLTIME FAVOURITES

To feel good all around

As if slipping into a comfortable cocoon, JACK WOLFSKIN's ESSENTIALS collection is composed of feel-good pieces that are truly difficult to top as far as cosiness is concerned. These nine styles are created for a crucial part of the training routine: the regeneration phase. They are terrific to relax in, put your feet up and wind down the body. Yet, due to their simple, classic look and great fit, they may be worn anytime, anywhere - as a monochrome look from head to toe, or in mix-and-match variations - according to personal style. Sustainability is a priority throughout the collection as all styles are made in Europe, primarily from organic cotton. Compared to conventional cotton, organic cotton uses significantly less water in cultivation and does not require the use of pesticides.

01 ESSENTIAL HOODY M This cosy organic cotton hoodie features an adjustable hood and a roomy front pouch pocket.

Material: HEAVY PURE ORGANIC COTTON FRENCH TERRY: 100 % Organic Cotton / RIB 1/1: 95 % Organic Cotton, 5 % Elastane

Weight: 660 g (Size M)

02 ESSENTIAL SWEAT PANTS M Slip in and simply feel good: These adjustable organic cotton pants are absolute all-rounders with a great fit.

Material: HEAVY PURE ORGANIC COTTON FRENCH TERRY: 100 % Organic Cotton / RIB 1/1: 95 % Organic Cotton, 5 % Elastane

Weight: 540 g

03 ESSENTIAL SWEAT SHORTS M When working out or cooling down, at the barbecue or when chilling: These soft, adjustable shorts always have you feeling cosy.

Material: HEAVY PURE ORGANIC COTTON FRENCH TERRY: 100 % Organic Cotton / RIB 1/1: 95 % Organic Cotton, 5 % Elastane

Weight: 340 g (Size M)

Material: HEAVY PURE ORGANIC COTTON FRENCH TERRY: 100 % Organic Cotton / RIB 1/1: 95 % Organic Cotton, 5 % Elastane

Weight: 491 g

TAKING RESPONSIBILITY – CONSISTENTLY & TRANSPARENTLY!

Thinking and acting responsibly is deeply embedded in JACK WOLFSKIN's corporate culture. The brand strives to keep its environmental footprint as small as possible and to establish safe and fair working conditions for all employees throughout the entire supply chain. In collaboration with leading independent organizations and foundations, the brand consistently screens (see below) and improves all operations and production stages - and shares them transparently for the general public to see. Online, JACK WOLFSKIN presents its Sustainability Book as well as the Social Report, which lists all measures in detail. Information about the supply chain and many other sustainability topics can also be found on the website.

A CLEAR COMMITMENT

JACK WOLFSKIN

- Reduces packaging waste as best as possible; among other measures, almost all apparel products will be shipped in recycled polybags starting as of winter 2021. Silica gel bags will also be eliminated from that date.
- Is consistently increasing the use of sustainable materials in its products. More and more recycled materials, certified according to the "Global Recycled Standard", are being utilized. Natural materials such as organic cotton or "wood fibres" are also being employed to a greater extent.
- Uses only organic cotton from certified organic sources.
- Uses only down certified according to the "Responsible Down Standard".

JACK WOLFSKIN has been a bluesign® system partner since 2011 and is thus committed to the strict standards of this independent organization. As a result, the brand guarantees sustainable, resource-conserving and monitored production as well as job security and the highest level of consumer protection.

As of the 2020 summer collection, the entire JACK WOLFSKIN clothing and equipment range has been 100 % PFC-free and therefore contains absolutely zero perfluorinated and polyfluorinated chemicals.

The JACK WOLFSKIN collection offers numerous bluesign® products. In the according pieces, not only the fabrics, but also the components, including for example buttons and zippers, meet the strict bluesign® criteria.

Since 2020, a large number of JACK WOLFSKIN products also bear the "Grüner Knopf" (Green Button), a government label for textiles produced sustainably. Not only the products are monitored, but also the entire company is audited according to social and environmental criteria.

Since 2010, JACK WOLFSKIN has been a member of the Fair Wear Foundation (FWF). In its Brand Performance Check in 2020, the independent foundation awarded the company Leader Status for the sixth consecutive year. The Brand Performance Check is publicly available online.

JACK WOLFSKIN IS ON THE MOVE TO
SHAPE CHANGE. **NOTHING WILL STOP OUR
INITIATIVE TO MINIMIZE OUR FOOTPRINT.**

TEXAPORE ECOSPHERE

LESS WASTE

The TEXAPORE ECOSPHERE membrane is entirely made from recycled materials. The technical membrane, a JACK WOLFSKIN design, is a composite of post- and pre-consumer waste.

INNOVATIVE SUSTAINABILITY

Technical fabrics specialist POLARTEC® is one of the leading pioneers in sustainable textiles. Developing innovative performance fabrics from recycled materials lies at the company's core.

nanuk NATUREBLEND

MORE EXTENSIVE USE OF ALL-NATURAL MATERIALS

The soft, highly functional fabric is composed of at least 25% natural fibres.

BIODEGRADABILITY

TENCEL™ Lyocell is a biodegradable fabric created by the Austrian company Lenzing. The functional fibre is derived from certified, sustainably cultivated wood.

SEAQUAL™ YARN

UPCYCLED MARINE PLASTIC

SEAQUAL INITIATIVE's yarn is made of recycled plastic, collected from the oceans by SEAQUAL's partners in Ocean Clean Up programs. The raw materials are traceable and certified.

AEROSHAPE

ECO-CONSCIOUS EQUIPMENT

The backpack carrying system's design is based on increased efficiency in manufacturing, reduced material consumption, and fully recycled materials.

SHAPING THE FUTURE

Ground-breaking backpack innovations

With its ambitious EQUIPMENT collection, in the summer of 2022, JACK WOLFSKIN positions itself as an innovation driver in the field of sustainable equipment. One of the key milestones is the **new AEROSHAPE body-contact carrying system**, which is featured in hiking and cycling backpacks. This carrying system is exceptional for its lightness, comfort and resource-saving design. For instance, a breathable Airmesh back panel consists not only entirely of **recycled polyester**, it is also **manufactured in a single piece**.

This highly efficient manufacturing process allows the brand **to significantly save on materials and therefore weight**. Two design features are combined: the Airmesh is paired with "Tunnels" which serve as containers for cushioning with breathable EVA foam. Beneath this layer, there's a textured, ergonomically pre-shaped ABS base plate. Thus, the carrying load is perfectly distributed, and the packs sit rock solid and stay comfortable on the back. JACK WOLFSKIN minimizes each layer and thus achieves a **high level of comfort while at the same time using resources sparingly**.

In the summer of 2022, the AEROSHAPE carrying system will be featured in five different backpack series: In the **ATHMOS SHAPE** range for hikers who appreciate lightness and speed; in the **WOLFTRAIL RECCO** range, which succeeds in delivering a high level of carrying comfort on multi-day trips; in the **VELO JAM** and **VELO CITY** multisport packs, as well as the bike-specific **MOAB JAM PRO** backpacks, where the superior fit of the ABS base plates is particularly beneficial. All backpacks feature extensive application of recycled materials.

The highlight among the patent-pending AEROSHAPE System backpacks is the TERRAVENTURE 22. This daypack consists entirely of recycled synthetic fibres, from the sewing thread to the webbing and the zippers. Plus, the carrying system's padding is made from algae foam. With AEROSHAPE, JACK WOLFSKIN emphasizes its ambition to lead the outdoor industry in technical innovation and sustainability.

EQUIPMENT

TERRAVENTURE 22

Jack
Wolfskin

TERRAVENTURE 22

Beacon in sustainability

- It is the most sustainable backpack in JACK WOLFSKIN's 2022 collection and a ground-breaking product for the entire industry.
- The very durable, hard-wearing ARMATECH CROSS RIP 300D RE material is made from recycled polyester fibres.
- The innovative AEROSHAPE design provides a high level of wearing comfort as well as thermo-regulation.
- The efficient manufacturing process of the one-piece design saves both on resources as well as on weight.
- The Airmesh is made from recycled polyester, the padding from algae foam.
- Every synthetic fibre, sewing thread, webbing, trimming as well as all buckles and zippers are made from fully recycled material. In the process, 14 1-liter bottles are upcycled per each backpack.
- Along with the padded hip belt, various fastening options and a floating top pocket, the daypack also features an integrated rain cover made of recycled polyester.

BIKEPACKING

Jack
Wolfskin

UNITED WE BIKE

INNOVATIVE BIKEPACKING BAGS DESIGNED TO TOUR THE WORLD

Whether riding the daily commute, or trekking across the Alps, JACK WOLFSKIN introduces five all-new bike bags designed perfectly for two wheeled adventures. The brand pays tribute to the fundamental shift of mobility and the booming trend of bike travel with a technical and sustainable bikepacking series engineered perfectly for overnights or overlanding on a bike. The bikepacking collection is easy to securely mount in a space conscious manner, providing a versatile stowage solution for every tour. In addition to the flagship Rack Bag, the Idstein, Germany-based brand, presents thoughtfully designed bags for the handlebar, top tube, frame, and the saddle, all of which are equipped with large reflectors making the rider more visible in poor light conditions. All of the products are produced with sustainability in mind through materials that are PFC free. Manufactured from extremely durable, waterproof ARMATECH PLUS 600D RE material made from recycled polyester fibres, with additional reinforcements in high stress areas, the series is ready-to-go for any adventure.

01 HANDLEBAR BAG 2IN1

- Two-in-One: This bag not only sits well on the handlebar, it also serves as a casual and well-fitted hip bag.
- Due to 5 different spacers, the practical bag may be easily fixed to any type of handlebar.
- Waterproof material plus taped seams protect the contents during wet conditions.
- It's ideal for light utensils or spare clothes.
- Volume: 4 l

Material: ARMATECH PLUS 600D RE: Recycled Polyester / MEGA PU: 73 % Polyester, 27 % Polyurethane
Weight: 170 g

02 SEAT BAG

- This slim, streamlined storage pack features a practical roll top keeping belongings completely dry.
- The robust, water- and dustproof material is made from recycled polyester that is further strengthened by reinforcements.
- Clever solution: tent poles may be safely stowed and secured in a separate outer pocket.
- Elastic straps allow the rider to equip themselves with an extra jacket, food bar and accessories for easy access.
- Volume: 10 l

Material: ARMATECH PLUS 600D RE: Recycled Polyester / MEGA PU: 73 % Polyester, 27 % Polyurethane
Weight: 400

03 TOP TUBE BAG

- This clever bag sits on the top tube where it is easy to access even while riding.
- Through the Clear-View pocket, the protected phone display or map is visible for easy navigation.
- Whether its snacks, patches, tools, a spare tube, power bank or a cable - everything is within reach.
- The waterproof and robust material is made from recycled polyester and strengthened by reinforcements.
- Volume: 0,8 l

Material: ARMATECH PLUS 600D RE: Recycled Polyester / MEGA PU: 73 % Polyester, 27 % Polyurethane
Weight: 150 g

04 TAKEOFF BAG

- Attached to the inside of the frame, underneath the top tube, this bag is placed in a particularly aerodynamic position.
- It's easy to handle and provides access from both sides, even while riding.
- The waterproof and robust material is made from recycled polyester and strengthened by reinforcements.
- Volume: 3,5 l

Material: ARMATECH PLUS 600D RE: Recycled Polyester / MEGA PU: 73% Polyester, 27% Polyurethane
Weight: 140 g

05 RACK BAG

- Waterproof roll top bag with ample capacity
- Robust, recycled material with reinforcements
- Padded bottom with additional reinforcements
- Main compartment features an additional inside pocket

Technical footwear with a small footprint

JACK WOLFSKIN's footwear segment is shaped by high standards and ambitious goals yet consciously maintains a smaller footprint through a commitment to sustainability in its new Spring/Summer 2022 collection. The German brand aspires free its entire footwear range of PFC by 2025. In summer 2022, the all-new TERRAVENTURE technical hiking boot styles mark a ground-breaking innovation for the entire industry by abandoning chemical treatments for water repellency without compromising on protection against the elements. Furthermore, both the proprietary waterproof, breathable TEXAPORE ECOSPHERE membrane as well as the inner lining of the boots are made entirely from recycled fibres. In general, to a large extent natural and recycled materials are used, from the sole to the midsole to the zinc eyelets.

01 TERRAVENTURE TEXAPORE MID M/W

Ground-breaking hiking boot

- The upper of this lightweight, ankle-high hiking boot consists of PFC-free, recycled synthetic material.
- The waterproof, breathable TEXAPORE ECOSPHERE membrane – a JACK WOLFSKIN exclusive – is made from a composite of post- and pre-consumer waste.
- Inside, a recycled lining plus an anatomically shaped tongue comfortably hug the foot.
- 30 % of the durable VIBRAM sole is made from recycled rubber, the comfortable EVA midsole consists of 30 % sugar cane and 3 % cork. Even the zinc eyelets are recycled 76 %.
- The positioning of the cleats provides a self-cleaning effect on the sole's tread that sheds dirt more efficiently to provide better traction even in muddy conditions.
- Due to the comfortable midsole, the dynamic gait support and the ergonomic design, this boot is perfect for long distances or multi-day tours.

Material: TEXAPORE ECOSPHERE: recycled inner lining tricot / recycled PFC-free synthetic upper material mix / Rubber toe cap / Recycled zinc hook set-up / Smooth tongue fit / Recycled ORTHOLITE PU-Rubber sock liner for best cushioning / VIBRAM cork-mixed EVA-Midsole / VIBRAM ECOSTEP sole
Weight: Men's: 1004 g (Size 8); Women's: 874 g (Size 4)

02 TERRAVENTURE TEXAPORE LOW M/W

The long-distance runner

- The upper of this lightweight multifunctional shoe consists of PFC-free, recycled synthetic material.
- The waterproof, breathable TEXAPORE ECOSPHERE membrane is made from a composite of post- and pre-consumer waste.
- Inside, a recycled lining plus the anatomically shaped tongue comfortably hug the foot.
- 30% of the durable VIBRAM sole is made from recycled rubber, the comfortable EVA midsole consists of 30% sugar cane and 3% cork. Even the zinc eyelets are recycled 76%.
- The positioning of the cleats provides a self-cleaning effect on the sole's tread that sheds dirt more efficiently to provide better traction even in muddy conditions.
- Due to the comfortable midsole, the dynamic gait support and the ergonomic design, this boot is perfect for long hikes.

Material: EXAPORE ECOSPHERE: recycled inner lining tricot / recycled PFC-free synthetic upper material mix / Rubber toe cap; Recycled ORTHOLITE PU-Rubber sock liner for best cushioning / VIBRAM cork-mixed EVA-Midsole / VIBRAM ECOSTEP sole
Weight: Men's: 956 g (Size 8); Women's: 756 g (Size 4)

NATURAL BY APPEARANCE

New footwear styles designed with hemp, cork and organic cotton

Timeless design meets all-natural materials in the JACK WOLFSKIN's summer 2022 footwear collection. The German outdoor apparel, footwear and equipment brand expands its popular range of ECOSTRIDE outdoor sneakers with two new styles - a sandal and a flip-flop. The minimalist, natural look reflects the shoes' sustainable approach. Exclusively undyed and resource-conserving materials are used throughout with materials including hemp that require up to 50 percent less water than cotton during its cultivation. Likewise, fewer pesticides and chemicals are used to grow and produce the fibres. The ECOSTRIDE's durable sole is made of natural as well as recycled rubber and the eyelets are made from 76% recycled zinc.

GROWN-UP PERFORMANCE FOR THE GROWING ONES

Well prepared for the wildest adventures

JACK WOLFSKIN is a brand for adventurers and the curious, for the intrepid and the tireless. And who has the greatest urge to explore? Kids! For endless hours they romp around and play in nature, explore hidden corners and seek new discoveries and experiences. JACK WOLFSKIN provides the appropriate equipment for the next generation in its comprehensive KIDS collection. The Mini Me collection offers functional, top-quality gear that is every bit as good as the adults' and, due to its excellent durability, equips for the wildest adventures. It allows kids to move freely, protects them from the elements, rapidly transfers moisture away from the skin and cools them down when their cheeks are burning up. Of course, JACK WOLFSKIN is just as dedicated to sustainability in the KIDS collection with natural fibres, sustainable dyeing processes and recycled materials.

01 ACTIVE HIKE JACKET K This waterproof and extra breathable hooded jacket relies on the technical TEXAPORE ECOSPHERE membrane, which is a compound of post- and pre-consumer waste. The zippers are water repellent.

Material: TEXAPORE ECOSPHERE MINI OTTOMAN 2L: Recycled Polyester, bluesign® Product; Grüner Knopf
Weight: 295 g (Size 128)

02 ACTIVE JACKET K Cool and rugged: this stretchy fleece jacket with the perfectly enclosing hood, delivers effective moisture management and thermo-regulation. Along with the chest pocket in contrasting colours, there are two more side pockets.

Material: NANUK DYNAMIC ROBUST HEATHER Q.M.C: 100 % Polyester
Weight: 235 g (Size 128)

03 ACTIVE HOODY K This Kids Hoody features a relaxed cut with a front pouch pocket, is super cosy and provides high breathability. The hood snugly fits around the head for proper protection.

Material: NANUK DYNAMIC ROBUST HEATHER Q.M.C: 100 % Polyester
Weight: 190 g (Size 128)

04 ACTIVE SHORTS K Shorts in big boys' style: The lightweight, elastic softshell material is wind- and water-repellent and made from recycled material. The patch side pocket in contrasting colour is especially cool.

Material: FLEX SHIELD ECOSPHERE: Recycled Polyester
Weight: 110 g (Size 128)

05 WOODLAND LOW VC K With its soft cushioning, the non-slip sole and its robust, yet breezy design, this Kids shoe is equipped to handle anything. The elastic laces are complemented with a Velcro closure.

Material: PU Leather; Second Material: Polyester Mesh; Lining: Elastane; **Sole:** Rubber
Weight: 492 g (Size 31)

06 ANIMAL MESH CAP KIDS Whether untameable, abundant hair, just like a wolf's mane, or a colourful coat of feathers grace the head, this cool Trucker Cap fits perfectly. The mesh material allows for plenty of ventilation.

Material: TWILL, BONDED FOAM, STIFF MESH: 100 % Polyester
Weight: 60 g
